OBJECTIVE

Entry-level Software Engineer with a strong foundation in Python, backend logic, and API integration, built through AI/ML and full-stack projects (Velvet AI, AI Data Analyst Web App). Seeking a Python-focused Software Engineer role to design and deploy scalable applications, manage databases, and contribute to automated, cloud-based deployment pipelines.

EDUCATION

VIT Bhopal University — B.Tech, Computer Science & Engineering (AIML) | CGPA: 8.01 2023 – 2027
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, System Design, Machine Learning

Intermediate (Class XII) — 95% 2021 – 2023
10th Class — 80.2% 2020 – 2021

SKILLS

Programming Languages: Python

Full-Stack Development: React.js, Streamlit, HTML/CSS

Machine Learning & AI: Machine Learning, Computer Vision, NLP, Google Gemini API

Cloud, DevOps & Tools: AWS (Amplify), Docker, Git, GitHub, CI/CD Pipelines

Databases & Data Analysis: SQL, SQLite3, DBMS, Pandas, NumPy, Matplotlib, Seaborn

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design, Problem Solving

Soft Skills: Communication, Problem Solving, MS Office

EXPERIENCE

Virtual Intern — ServiceNow University (SmartBridge, in association with AICTE) Completed Jul 2026

- Applied software testing principles using the Automated Test Framework (ATF) to build and validate automated test cases, alongside ServiceNow Administration Fundamentals, Flows, Reports, and Agentic AI modules.
- Prepared for the Certified System Administrator (CSA) exam, covering platform configuration and workflow automation. Certificate ID: SNU2028316, endorsed by AICTE, Ministry of Education.

PROJECTS

Velvet AI — 3D Digital Twin & Virtual Wardrobe (Python, PyQt6, NumPy, React, AWS, System Design)

- Developed a desktop-first 3D Digital Twin application that generates a personalized avatar from user body measurements using SMPL-style body geometry and real-time mesh rendering.
- Engineered a second-skin clothing system that dynamically maps garments onto the avatar using vertex-based mesh layering, dominant color extraction, and procedural fabric pattern generation for realistic visualization.
- Implemented a measurement-driven fit analysis module comparing body and garment dimensions to provide real-time fit recommendations (Too Tight, Good Fit, Loose).
- Built a React.js web companion application and deployed it via AWS Amplify with GitHub CI/CD, demonstrating cloud deployment, modern frontend development, and scalable application architecture.

AI Data Analyst Web App (Python, Streamlit, Pandas, SQLite3, Google Gemini API, NumPy, Matplotlib, Seaborn)

- Developed an AI-powered data analysis application supporting CSV and SQLite datasets using Python.
- Designed a natural language interface using the Google Gemini API to convert user queries into executable Python analysis code, with a Pandas-based fallback for reliability.
- Implemented data cleaning, dataset preview, descriptive statistics, and interactive data visualization using Pandas, Matplotlib, and Seaborn.
- Built an intuitive Streamlit interface for uploading datasets, performing AI-assisted analysis, and displaying statistical summaries and visual insights.

Budget Buddy — Personal Finance Web App (React.js, JavaScript, Firebase Firestore, Recharts, Netlify, Git)

- Engineered a real-time expense tracker with category-wise analysis and interactive data visualizations, with data exportable as a downloadable CSV file.
- Integrated Firebase Firestore for live data management and AWS Amplify for automated GitHub-based deployments.

CERTIFICATIONS & ACHIEVEMENTS

- Applied Machine Learning in Python — Coursera, University of Michigan
- Google IT Support Professional Certificate — Google (Completed March 2026)
- HackerRank Python — 3-Star (Silver) Badge

Languages: English, Telugu, Hindi
